

with regard to Sinclair Broadcasting's decision to force their stations to air an anti-Kerry documentary days before the election, I feel this is a clear example of the misuse of powers given to media giants.

If the Sinclair Corporation is using the public airwaves free of charge, it is obligated by law to serve the public interest. Biased representation of information does not serve public interest. I feel that public free airwaves should be utilized only for purposes that offer well-rounded, unprejudiced information that is factual and allows the reader to develop their own conclusions.

Current efforts being made by the Sinclair Corporation exemplify the dangers inherent to corporate control of the airwaves. The fundamentals of free speech and democracy are being ignored. It is the responsibility of the FCC to address this situation in a way that protects the foundations of freedom of speech in our society. Thank you.
